

## ATAGENIX LABORATORIES

# Catalog Number:ATA24301 Actinin-α1 rabbit Polyclonal Antibody

#### 产品概述

产品名 ( Product Name ) Actinin-α1 rabbit Polyclonal Antibody

货号 (Catalog No.) ATA24301

种类 ( Category ) Primary antibodies

宿主 (Host) Rabbit

**反应种属(Species specificity)** Human,Mouse,Rat

**应用实验(Tested applications)** WB,ELISA

**克隆性(Clonality**) Polyclonal

**偶连物(Conjugation**) Unconjugated

免疫原(Immunogen) Synthesized peptide derived from Actinin-α1 . at AA range: 1-80

产品性能

状态 (Form ) Liquid

存放条件(Storage) Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 4 °C

for frequent use. Store at -20 to -80 °C for twelve months from the date of receipt.

纯化方式 ( Purity ) The antibody was affinity-purified from rabbit antiserum by affinity-chromatography

using epitope-specific immunogen.

### 应用

Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.

#### 产品背景

actinin alpha 1(ACTN1) Homo sapiens Alpha actinins belong to the spectrin gene superfamily which represents a diverse group of cytoskeletal proteins, including the alpha and beta spectrins and dystrophins. Alpha actinin is an actin-binding protein with multiple roles in different cell types. In nonmuscle cells, the cytoskeletal isoform is found along microfilament bundles and adherens-type junctions, where it is involved in binding actin to the membrane. In contrast, skeletal, cardiac, and smooth muscle isoforms are localized to the Z-disc and analogous dense bodies, where they help anchor the myofibrillar actin filaments. This gene encodes a nonmuscle, cytoskeletal, alpha actinin isoform and maps to the same site as the structurally similar erythroid beta spectrin gene. Three transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008],
